Professional Summary

Frontend-focused Full-Stack Developer with 4.5+ years of experience building scalable web and mobile applications using Angular, React, and Ionic. Experienced in designing RESTful APIs, working with Java and Python backends, and leading frontend teams on enterprise and government-domain projects.

Skills

- Languages: Java, Python, JavaScript, TypeScript
- Frontend: Angular (v4–v19), React, Ionic, HTML5, CSS3, Tailwind, Bootstrap, Jest
- Backend APIs: Node.js, Spring Boot, Django ORM, REST APIs, GraphQL, JWT, Redis, WebSockets
- **Tools & Concepts:** Git, Postman, Responsive Design, Performance Optimization, System Design

Work Experience

FullStack Developer, VJL IT AUGMENTS (Remote) Aug 2025 – Present.

- Architected and developed a Government Healthcare Test Data Platform for UK public health, enabling structured management of multi-disease diagnostic datasets.
- Accelerated development by leveraging AI-assisted workflows, delivering core platform features within 2 weeks and reducing overall development time significantly.
- Led frontend development using Angular 18, mentoring a team of 4 developers while implementing performance optimizations such as lazy loading and efficient component rendering.
- Designed and implemented modular, scalable frontend architecture in collaboration with cross-functional stakeholders, translating complex public-sector workflows into production-ready features.

FullStack Developer, Rhythmflows Solutions, Pune Oct 2024 – July 2025.

- Developed enterprise dashboards and reporting systems for clients including HDFC, NSDL, and Bajaj.
- Designed and integrated REST APIs using Django ORM and SQL, enabling efficient data handling, query optimization, and scalable frontend-backend communication.
- Implemented real-time features including user-to-user chat using Redis and WebSockets, along with UI enhancements such as Dark Mode, lazy loading, responsive design, and chart visualizations.

FullStack Developer, Otobit Pvt Ltd, Surat Mar 2023 – May 2024.

- Developed and deployed cross-platform mobile and web applications using Angular and Ionic 6, delivering responsive UI, gesture-based interactions for mobile, and enhanced user experience.
- Integrated REST and GraphQL APIs using Node.js with Tailwind CSS-based UI, ensuring efficient data flow, seamless frontend-backend communication, and consistent design.
- Designed and implemented microservices-based modules for dashboards, payment processing, authentication, and CRUD operations; led a team of 3 developers and incorporated unit testing to ensure reliability.

Frontend, UI-UX Developer, Tata Consultancy Services Mar 2021 – Oct 2022.

- Developed custom UI components and implemented features such as lazy loading using AngularJS, while contributing to backend CRUD operations using Java and Maven.
- Managed testing workflows including manual and unit testing across DEV, INT, and UAT environments, ensuring stable and reliable releases.

Personal Projects

- **Health Planner App (Angular)** deba-maity.github.io/healthplanner
A diet and fitness planner built with Angular. Includes dashboards, goal setting, and tracking features.
- **Angular Features Showcase (Angular 17)** deba-maity.github.io/Angular-features
Demonstrates Angular routing, reactive forms, services, and dynamic component rendering.

Education

B.Tech in Computer Science, University of Engineering and Management

2016 – 2020
